RELIABLE ADVIOUS.-The News has intelligence from Kansas that "a considerable portion, if not a mejority of the Republicans, have already come over to the Democracy, or will do so before the election on the od of June;" and that with their help " the Democracy with northern opinions"who, according to the News, are the only real and reliable friends of Freedom in Kansas-will make it a Free State. We can assure the News that not a majority only, but the intire Republican party, out of Kansas, as well as in it, will help to make it a Free State and will be very glad to find "the Democracy with northern principles' co-operating in this good work. Whether the Free State men of Kansas, however, will take the course marked out for them by the Border Ruffians and Sham Democracy, is another and very different question, as the News will presently discover. "The Republicans" adopted a Free State Constitution for Kansas more than a year age, but the Democrats in Congress, Northern as well as Southern, refused to accopt it all they. repent now of their error, and are ready to conrect it, so much the better for the cause of FREE

NEW CITY AND NEW PAPER.-We are in reccipt of the first number of a new and very neat hooking six-column paper, called the Telegraph and published by A. W. and J. A VALUABLE INVENTION .- The Racine Advocate says that Mr. George Hely, of Rochester, in that county, has invented what he calle a "Horeo Power Equalizer," a very simple, yet effective contrivance, by which, when attached to a machine driven by Horse Power, the driver is enabled to hold complete control over, his horses, making each one do its share, whether it has the disposition to do so or not. It also can be adjusted so as to work with perfect equality on a side hill as on level ground—does away with all danger from fractious horses—runs steadier, consequently cleans better, while it cannot be not with the cannot of what sown in the county the present spring, is fully equal to that cannot of what sown in the county the present spring, is fully equal to that the county the present spring, is fully equal to that cannot in the lands of later and as an expect of late of a was keason, owing to the standard part of a was ke by an equal distribution of strength to do as much and do it as easy as eight by the old way. BOATS AND BOATNG.—The large and spirited heat clube of this city are now fairly embarked upon their season, and meet for daily practice and training. The approaching regatts on the 4th of July is receiving all preliminary attention, and we predict it will be an occasion of which all is participants may well be proud. There is no more healthy exercise than rowing, and it is just the relaxation needed by our young men of business in the odd hours when they should leave the folion and the counting room for a smart pull upon the surface of the basin or the lake. The Floneer, the Wenoms and the Lady Putness and their spirited owners, are an institution we cannot well spare, and we trust their number will be still further increased. It is a noble exercise. We take from the N. Y. Christian Advocate another account of these awful backshidings in the Methodist Church. After reading it, let any one ask himself, can they be accounted for in any other way than the way we have dono—viz: that the large majority of the "converts" are not converted? And as this is the fruit of the reviconverted? And as this is the fruit of the revi-val system, we ask, ought not this system of pro-ducing revivals be put an end to? As none of us are perfect, so we ought not to be indignant with a brother, if he kindly points out our imperwith a brother, it he kindly both out of the high fections. This we have done, with the very kindest and most brotherly feelings towards those who do the things of which we complain.

"It is truly painful to hearts burning with a desire for the salvation of men, to follow the conference eccretary in his call for statistics, with a core of the previous year minutes before with a copy of the previous year's minutes before them, and witness the large decrease in the membership of so many of our charches. For instance, a certain church reported one year 120 in full membership, and 110 probationers making a total of 259 in the society. The following year the report from that church was 133 in full membership, hong a depreciation of 85 in a similar bership, being a depreciation of \$5 in a single year, or an actual increase of only 24 members from an accession of 110 probations. Another church in a certain reported 157 full members and 150 probationers, or 307 names in the society. The following year the same charge reported ty. The following year the same charge reported of full members 200, an aggregate increase of only 48 members, out of 100 converts, a falling off of 102 in a single year. I am sorry to add, that these cases are but fair representations of the aggregate results of our operations as a Church, within the bounds of this Conference, during the year anding April, 1856. during the year ending April, 1856."

The Concert Last Night. THAT BERG'S Becond Concert, last evening, attracted udience than the first. The s

beautiful Hall of the Albany was crowded to its full ca-pacity and presented a glittering coup d'oetl. Paront, anately, was too unwell to sing and we missed be unfortunately, was not anced in a law Training, Mol-same of the content exceedingly; but Training, Mol-lawaras and Madame Brancock made up for Panon's enforced absence, by giving a number of extra pieces. enforced absence, by giving a name of case present the audience was in the best possible humor and encorred everything without disorimination. Motivatavax made an especial hit in his two pieces on the Violencello which evinced a wonderful mastery of the instrument, and Tealman thrilled the wast audience, with his delicious de. It was indeed a rare treat. IMPARCABLE CONDITION OF THE STREETS IN THE

FIFTH WARD. - Rearly all the streets in the Fifth Ward FIFTH WARD.—Rearly all the streets in the Fifth Ward and is the most shameful condition, and to navigate and by through some of them would take more nautical skill than drivers generally possess. Grove street has perfect much hole from one end to the other, and in its present state no vehicle of any kind can pairs over it. Why the Adgresses of this ward don't do something to improve the endition of this ward don't do something to improve the endition of the streets in more than we can tall. The condition of the streets is more than we can tell. They appear to take no interest whatever in the state of the public thoroughfares, for little or nothing has been don stely to improve the streats in this part of the city, or syan to keep thom from becoming entirely useless. A contract has been made with Mr. Brookway to run a line of omnibuses from Spring Sirect Bridge to the Forest Home from Mondey next. The contract is signed, but Mr. B, informs us that he is unable to fulfill it, on account of the frightful state of the circust in the First Ward, perticularly Grove street. If the streets in this Ward are not speedily repaired, business in this part of the city will not specify repaired, under the is impossible for farmers to come is this way with their produce, without running the sisk of getting stuck in the mud, or breaking their wag-

Building Materials on East Water St.—As a matter of course great privileges will be given to thore who are putting up new buildings in the city, in using the sixests for materials, \$0., but when they take about four fifths of the most populous thoroughlars in our city, arms corresponde, we think it is an energael ment on the rights of the public, and a suisance to storckeepers in the vicinity, as well as a gross injustion to them. We the vicinity, as well as a gross injustice to the street as much as any printer that one-half of the street is as much as any printer that one of the street is as much as any printer that one of the street is as much as any printer that one of the street is as any printer that one of the street is as a superior that of the street is as a superior that one of the street is as a superior that one of the street is as a superior that one of the s ary for the largest building that could be pur necessary for the target number than the law allows, pp.: although this is even more than the law allows, yet we feel assured that no one would find fault with huliders, if they would confine themselves to this extent. The briefs, stones, and other materials for Mr. Quentin's new building, are strewed round invues a loss and careless manner as almost completely to stop up the passage on that part of East Water street. Where is the City Marchai?

As OUTRAGE .- On East Water Street, nearly ionnesite Mahler & Wendt's new block, there lays about a ten of the most rugged and dangerous stones, half way between the sidewalk and the middle of the sivest. They are not large enough to be seen by drivers at night, and just the kind to rain or kill any horse that might run onto them. We have expected from day to see them. them. We have expected from day to day to see them removed, but as there are no indications of that's being one; we feel that it is our duty to call public attention the matter. Yesterday, a gentleman who keeps a store close by, had his horse's leg severely injured by it, and should be loss his horse, the city will probably have to foot the big. There is no excuse whatever for leaving those stones in the street, as the buildings have been fin-for menths. Whose business is it to see that the public theroughfaces are not unnecessarily obstructed? We are under the impression that it is the City Marshal's.

FATAL ACCIDENT-A MAN KILLED -On Thursday afternion a man named Thomas Burps, fell from the top of the main mass of the brig Hutchinson, a distance h tremendous force as to drive part of the soull halfnees remember force as to drive part of the soull half-as-inch into the plank, and of course was instantly killed, The beig was out on the lake, about 20 miles from this city, and Burns was engaged on the rigging when the acedient occurred. He shipped on this brig at Chicago, but was formerly from Marshall, Michigan. It seems that Burns was not a regular sailer, but being in a very desti tute condition begged of the captain to take him on toard, and pay him anything that he was worth, which he did we from charity than anything clse. His body was interred in the poor house burial ground yesterday after

CLEAR UP TOUR STREETS AND ALLEYS. -- Saturday it will be remembered in the day for cleaning the stream, and those who neglect to do their part are subject is a fine. The occupants are required to have the dirt gathersé up in heaps, and the city provides means for coving it away. There is nothing which will preserve the earting it away. There is nothing which will practive the health of the city and the good appearance of the streets more than the district more than the district away are more as possible after it is gathered up.

PICTURE OF HEALTH AND BEAUTY.

A few dones of Radway's Regulators will insures clear, fair, pure and healthy siln and array complexion. They give to those from the with weak dull, yellow eyes, a clear and brilliant appearance. Radway's pillingive analysis of the firm, eyes and the healt and the use of the Ready Relief as a wash for the tach and an aromatio fe fict breath, will change the most degusting foul breath to tweetness, and the blackest teeth to Parian whiteres. Due to ton of Radway's Regulators a done; they never do injury, but always do good.

CONGESTIVE DIREASES, APOPLEXY, TERMINATION OF BLOOD TO THE HEAD.

Persons of full blooded plethorlo habits are more subtitue of the congestive disames, headaches, rush of blood to the head, than there of a lean habit; bleeding in these eneas is highly detrimuntal, nor does this practice lesses that danger; the dilliculty is not caused by too much blood, but yo its disturbed circulation, and the irregular action of the head. Now a done of Radway's Regulators will cerved at it these difficulties—the, will corroca the action of the head. More purging in these exacts in these difficulties—the, will corroca the action, and will immediately equivalent the circulation, and the irregular action of the head. More purging in these cases will operate the circulation and the process the action of the blood. More purging in these cases will operate the circulation and the strength of the head, there are not only regulate the bowels, by which all disease.

Radway's Regulators not only regulate the purged from the chart, by an expension, the learn, liver, nare, such and every organ, the heave, brain, liver, nerves, breat, blood, and every dissuch the whole organization, a healthy and regular action.
